University of Rochester
Fall 2014
Mondays and Wednesdays, 9:00-9:50
Morey 321
Office Hours: Wednesdays, Harkness 320B, 2:15-4:15

International relations is the study of how states interact with each other. This course builds a working knowledge of our field, introducing the background, theoretical, and empirical tools necessary to understand international relations today. Students will learn about important findings in a variety of subfields, including war, international political economy, institutions, and nuclear proliferation. To do so, the course emphasizes readings from original research material rather than from a textbook. Further, students will solve problem sets and work with common international relations datasets to obtain a working understanding of the discipline's methodological foundations.

Course Materials

Blackboard is difficult to work with. Thus, I will post all course materials on my website: williamspaniel.com/pscir-106. Most importantly, this includes links to required readings, PDFs of lecture slides, and recorded videos of lectures.

There are no required books for this course. However, students may find it useful to purchase *World Politics: Interests, Interactions, and Institutions* as a reference textbook. Amazon has [rental copies](#) for under \$30.

Recitation

This class has weekly recitations in place of the scheduled Friday lecture. We will meet in class on the first Friday (9/5) to assign you to a teaching assistant. Recitations are mandatory and constitute a large portion of your grade. There will be no leniency for students attending lecture but not recitation.

Evaluation

Grades have four components: two problem sets, two data analyses, recitation, and two exams. The problem sets are worth 10% each and will test your ability to think strategically about basic problems in international relations. The two data analyses are worth 5% each and will ask you to become more familiar with IR's common datasets. Recitation is worth 20% and will be based on attendance and participation, as your teaching assistant will further detail. The exams are non-cumulative and each worth 25%.

After weighting each individual grade, final grades will be no worse than the following:

$94\% < x$:	A
$90 \leq x \leq 94\%$:	A-
$87\% < x < 90\%$:	B+
$83\% < x \leq 87\%$:	B
$80\% \leq x \leq 83\%$:	B-
$77\% < x < 80\%$:	C+
$73\% < x \leq 77\%$:	C
$70\% < x \leq 73\%$:	C-
$x < 70\%$:	Non-passing grades

Disclaimer

This syllabus is subject to change. Any changes will be announced in class. You alone are responsible for attending lecture and checking the website to stay up-to-date.

Teaching Assistant Recitations and Office Hours

Gleason Judd
